

The Evolution of LayMor

The LayMor 3 wheel sweeper has been the industry leader since its inception in 1985. From the 6A, to the 8B, to the current 6HC/8HC, this unit is now a mainstay in the rental equipment sector.

The Versa Sweeper was born in Seguin, Texas

Waldon Mfg. purchased the Versa Sweeper

The Versa becomes the SweepMaster

The latest generation of the 3 wheel was introduced (6HC/8HC)

The LayMor sweeper line began production at the Capacity of Texas facility in Longview, TX

In October, 2008, the SweepMaster enjoyed its greatest improvements with the addition of the Kubota 3600 (Tier III/IV) engine. New design & eye-catching look were implemented at this time

1977 | 1983 | 1985 | 1994 | 1999 | 2001 | 2008 | 2009 |

The LayMor 3 Wheel & Walk Behind Sweepers were introduced into the market

The LayMor product line was purchased by Waldon Mfg. and began production in Oklahoma

Collins Industries purchases Waldon Mfg.

More improvements to the SweepMaster and 6HC/8HC will be unveiled later this year

The SweepMaster has enjoyed many revisions and updates since its inception. From the SM II, SM B and now to the SM250, the SweepMaster has been the machine of choice in the milling & paving industry.
